

Some of our planned future for the Baltzer Meyer Center, Greensburg, PA. In 2019 we had these perspective drawings made for the upgrade of the center. This includes a new area for the Paul Miller Ruff Library. Renovation of the existing garage area into a meeting room and storage of artifacts. Move the operations offices to the existing library area. Restore the church area into a Community Room, with the renovation of the rear addition into new bathrooms, small prep kitchen and storage area for tables and chairs. The exterior is planned to have a porch to view the mountains in the distance, with the ability to dine on this porch. Restore with all the windows and doors, clean and seal the brick. This is the plans to help Baltzer Meyer to become self sufficient in the future while still preserving our family and local history for future generation.
