

# Metaphysics and the Paranormal

*the science behind the haunt*

Join Dr. Jay Blackburn as he explains some of the science behind the paranormal. Learn how an actual investigation is conducted with a scientific approach, rather than the dramatics that you often see on television. Dr. Blackburn will identify the different types of hauntings, to include the characteristics that make each one unique. He will also discuss how various psychic abilities can influence investigations.

This is the introductory presentation of a six part series. Future dates will be announced at the presentation.

Saturday, April 12th 2025 from 3PM to 6PM

at

Baltzer Meyer Historical Society

642 Baltzer Meyer Pike

Greensburg, PA 15601-7562

There is no charge for the presentation, but donations to the Historical Society are always greatly appreciated!
